

3,500+  
ICE VENDING  
MACHINES AROUND THE WORLD

## LARGEST CAPACITY HIGH VOLUME DESTINATION

The Ice House is our premier ice and water vending machine, offering the highest capacity production and storage of any of our three models. It is the nation's leading ice and water vending destination and features five patented technologies plus a filtration process that ensures the freshest, most hygienic ice and water product available. About the size of two parking spaces, the Ice House is the high capacity, high volume solution for your high traffic location, such as retail business centers, home improvement locations, recreational centers and convenience store locations.

# ICE HOUSE

## Our Story

In 2003, Ice House America revolutionized the ice industry by combining precision manufacturing, state of the art engineering and cutting-edge technology to provide premium ice direct to the consumer at a wholesale price. Since that time, we have grown to support over 3,500 machines worldwide with a new machine installed every 2-3 days. Our Vision is to be the most recognized consumer ice and bulk water brand in the world. To accomplish this Vision, we committed to innovating our models to evolve with the consumer marketplace.

## Scalable Business Opportunity

The retail ice business is a \$4 billion recession-proof industry. Ice vending is rapidly growing in this industry and is well-suited for entrepreneurs looking for bankable ROI with a low-cost operation and a simple to manage business model. Our independent ownership opportunity offers you the flexibility to operate one ice vending machine or scale your fleet of machines to capture a larger portion of this industry.

## Innovative Leadership

Our machines represent over 90% of the ice vending business in the world. We maintain this level of market share by investing time and resources into continuously improving the reliability, quality and customer experience of our machines. However, don't just take our word. Come visit our manufacturing facility and see for yourself why our machines are the best in class.

## Warranty

Ice House America models have a one-year warranty plus each major component has its own manufacturer warranty policy.

## High Capacity Destination

The Ice House is the original ice vending machine concept we launched in 2003. With a 200 ft<sup>2</sup> footprint (2 parking spaces) and up to 13,000 lbs of ice production capacity, the Ice House is truly a manufacturing plant that can accommodate up to 50,000 customer visits annually. It is the ultimate destination model, that will attract customers not only by its curb appeal, but equally by the unique design of the machine.

## Water Vending by Twice Pure Water

Water vending is a sustainable and profitable business that continues to grow thanks to the increased awareness of water quality concerns throughout the world. Combining ice and water vending not only increases the profitability of the business, it attracts different consumers to increase the overall traffic flow to the location. Add to this the purified water quality from our Twice Pure Water™ and there is a great potential to own both the ice and water business in your market.

## SmartIce™ Remote Management System

SmartIce™ Remote Management System, a web-based application, lets you manage all aspects of the vending machine - including location information, product sales, technical operations, and customer service. It offers real-time alert messages and current sales data. It lets you compare sales trends, benchmark locations and evaluate machine performance. Most importantly, SmartIce gives you the visibility to see what your machine is doing from the comfort of your home or anywhere you can connect to the internet.

Twice the Ice™ is an Ice House America Independent Owner Brand. Tel 888.391.8065 [www.twicetheice.com](http://www.twicetheice.com) [sales@icehouseamerica.com](mailto:sales@icehouseamerica.com)

## Technical Specifications

- Dimensions : 8' 4" W x 24' D x 15' H (2 parking spaces)
- Products
  - Bulk Ice
  - Bagged Ice: 10 lb, 16 lb, and 20 lb options
  - Purified or Filtered Water: 1, 3, and 5 gal options
- Ice Bin Capacity: 6,500 lbs
- Ice Production Capability: 4,500 - 13,000 lbs in 24 hours
- Healthwise™ Filtration System
- SmartIce™ Remote Management

## Ice House with 5200SM Ice Maker

- Power Requirement: 77A @ 208- 240/60/3 (123A w/2nd Ice Maker)
- Power Consumption: 216 KWH per 4,500 lbs
- Water Consumption: 542 gal per 4,500 lbs
- Ice Production: up to 4,500 lb per 24 hrs (9,000 lbs w/2nd Ice Maker)

## Ice House with 1000SM Ice Maker

- Power Requirement: 98A @ 208-240/60/3 (158A w/2nd Ice Maker)
- Power Consumption: 300 KWH per 6,500 lbs
- Water Consumption: 783 gal per 6,500 lbs
- Ice Production: up to 6,500 lbs per 24 hrs (13,000 lbs w/ 2nd Ice Maker)
